To whom it may concern,

University of Iceland's faculty of Industrial Eng., Mechanical Eng. and Computer Science intends to be in research collaboration with HiDef Knits -- a free an open-source software to design knitwear garments that produces written instructions for hand knitting.

Dr. Tomas Philip Runarsson, will supervise a masters student in computational engineering, and Dr. Helga Ingimundardottir of HiDef Knits will co-supervise. The position of MSc student will be advertised to be conducted the school year 2017-18.

Sincerely,
